

Ben Ross

Preparation Notes:

Lines 20/22 Do not conform to python coding standards. Need to only be 80 chars wide

Line 57. Explain schedule class in docstring. Someone could import and not see the file docstring, where the class is explained

Magic numbers on 83 and 85.

Logic is weird Line 124/125

Change hashmap logic, will assign last position, not first position

Docstrings in perform_crossover and perform_mutation need to be changed to explain the method without referencing file docstring

Total Time: 30 Minutes
